Mindtek Research

# Precision Peptide Systems

Presented by the Athonia Laboratory Team

## 01 Needleless

Non-invasive introduction, using  
transdermal diffusion technology

## 02 Painless

Non-invasive technology eliminates  
customers' fear of needles.

## 03 Safety

During operation, it will not cause  
trauma to the skin

## 04 Burst

Can be set for multiple bursts, no need  
to take the product with the ampoule  
head frequently, just one time

## 05 Mute

Ultra-quiet below 30 decibels,  
pressurized softly and no lag

# Proven Results

Precision Protocols. Measurable Outcomes.

## Targeted Results

Drive specific, trackable improvements in recovery, cognitive function, hormonal balance, and longevity pathways using clinically structured peptide protocols.

## Immediate + Long-Term Performance

Experience controlled performance elevation while building sustainable biological resilience.

This is not short-term stimulation—it is system-level optimization.

## CRI-Guided Optimization

Every protocol is built using our **Close Regenerative Index (CRI)**—a data-driven model integrating biomarkers, symptoms, and recovery capacity. No assumptions. No templates. Only targeted intervention based on your physiology.

# Why Choose Us?

## Unmatched Purity and Exclusivity

## Direct Advantage

Our manufacturer-direct advantage guarantees **unmatched purity of 99% without TFA, GMPc** and exclusivity, ensuring that you receive only the highest quality peptide stacks, free from contaminants and fillers.

## Physician Founded First Mover (2017)

Dr Anthony Close founder of Lab Me Analytics, Bonfire MCT, Dripdok & Mindtek has innovated SEA since 2007. No stranger to lab partnerships and ethical reliable sourcing and stringent QA due to a background in Analytical Chemistry.

## Proprietary Synergy

Each proprietary stack is expertly designed for **maximum synergy**, differentiating our formulations from competitors, allowing for enhanced effectiveness and tailored results that meet your specific needs.

# What to Expect

**Precision-compounded in a sterile, pharmacy-controlled environment for consistency, purity, and clinical reliability.**

Each cartridge is prepared under regulated compounding protocols to ensure safety and performance integrity.

Clinically formulated. Precision dosed. Consistently delivered.

## Targeted Cycles

Our three synergistic cycles are meticulously designed to address specific performance needs, ensuring each formulation is optimized for effectiveness and efficiency in achieving desired results.

## Custom Guidance Through Dripdok

Each blend comes with personalized dosing and delivery protocols, providing users with comprehensive instructions to maximize absorption and efficacy for optimal performance enhancement.

We do not operate on open access. Entry is either granted or secured through a \$250 protocol allocation, fully credited toward your initial purchase. This mechanism exists to ensure only serious participants proceed, maintaining protocol precision, compliance, and outcome integrity.

# REGENESIS-3™

A precision-engineered peptide system designed to accelerate tissue repair, amplify recovery signaling, and restore regenerative capacity at the cellular level.

Delivered in a single, streamlined pen for consistent daily optimization over 28 days.

## Benefits

- Accelerates soft tissue repair and injury recovery
- Enhances growth hormone signaling for deeper regenerative output
- Reduces inflammation and supports faster recovery cycles
- Improves sleep quality and overnight repair efficiency
- Streamlines recovery into one precise, daily delivery system

# NEUROVANCE™

A precision neuro-regenerative peptide system designed to enhance cognitive clarity, support neuronal repair, and stabilize mental performance under high demand.

Built for daily use to drive sustained focus and long-term brain optimization.

## Benefits

- Enhances focus, clarity, and cognitive processing speed
- Supports neuroplasticity and long-term brain resilience
- Reduces anxiety-driven cognitive interference
- Improves sleep quality for next-day performance
- Delivers stable, daily cognitive optimization

# METABOLYX™

A precision neuro-regenerative peptide system designed to enhance cognitive clarity, support neuronal repair, and stabilize mental performance under high demand.

Built for daily use to drive sustained focus and long-term brain optimization.

## Benefits

- Enhances mitochondrial energy production
- Supports fat metabolism and body recomposition
- Improves insulin sensitivity and metabolic flexibility
- Increases daily energy and endurance capacity
- Drives long-term metabolic resilience

# ATHLETEX™

A performance-optimized peptide system engineered to enhance recovery speed, muscular adaptation, and training output.

Designed for athletes requiring consistent, high-level physical performance and accelerated recovery cycles.

## Benefits

- Enhances recovery between training sessions
- Supports lean muscle development and repair
- Improves sleep-driven anabolic signaling
- Strengthens connective tissue resilience
- Sustains high-performance output over time

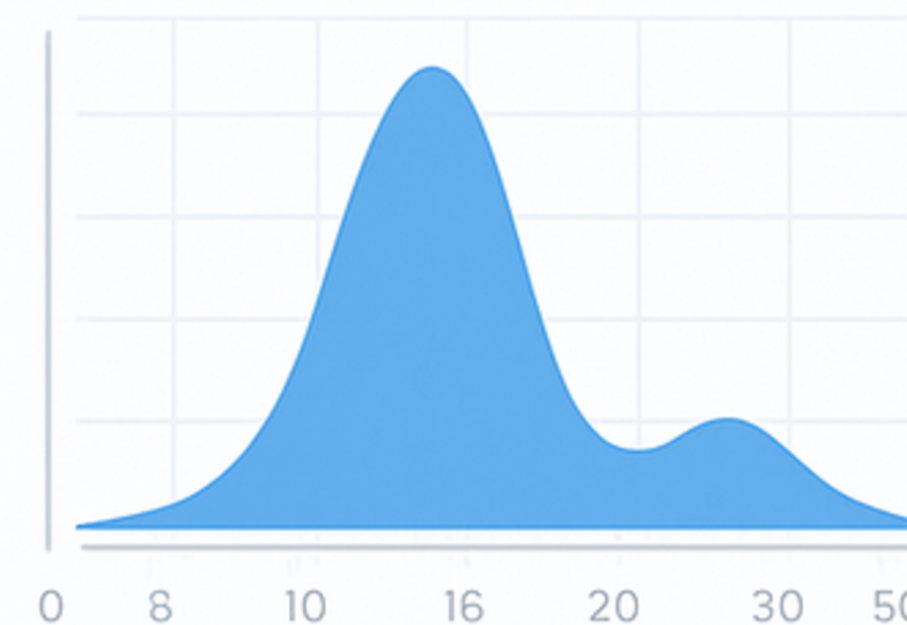

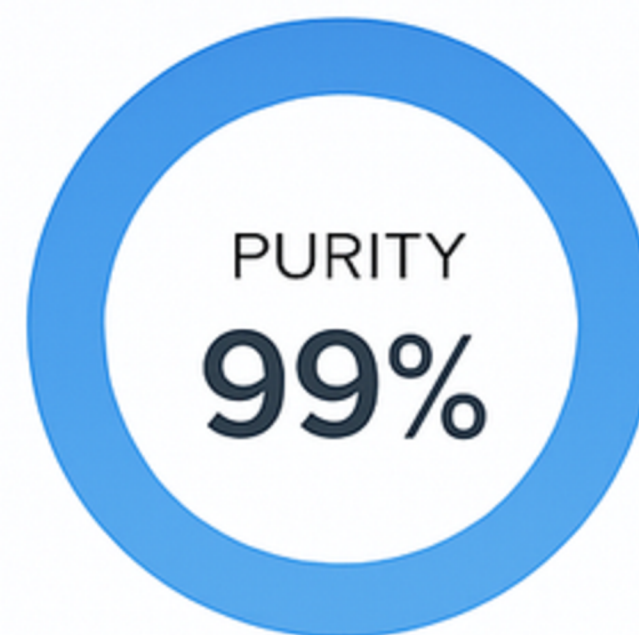

# Analytical Chemistry Advantage

## Quality Assurance

Defined by precision. Backed by rigorous quality control. Delivered with uncompromising purity. Our founder Dr Anthony Close has a background in analytical chemistry and molecular genetics and has consulted with numerous peptide labs and designed proprietary peptides alongside researchers.

# HOW IT WORKS

## Apply for Access

Submit your application for consideration. Access is limited to individuals committed to a structured optimization protocol.

## Acceptance & Protocol Design

Upon acceptance, your personalized protocol is engineered based on your goals, physiology, and performance targets.

## Initiate Your Program

Begin your precision-compounded protocol with ongoing support and optimization as needed.

# Contact

Due to the time and effort put into each client to ensure commitment and budget you need to...

Apply for consideration. Protocol development is initiated upon acceptance.

[Apply For Consult](#)

Protocol design is initiated only for committed clients. A planning fee may be required, fully credited toward your program upon acceptance. This ensures the integrity of our formulations and process.
